Hi,

I've made a few suggested revisions/comments.

I think the impact of including non-consumers vs. consumers only needs to be revised a little given the implementation of the NCI approach. I also think the State may wish to come up with guidelines for what constitutes a fish consumption survey that would be suitable for development of AWQC.

Again, I'm hoping you kept a list of my action items! One was a reference to the RSC decision tree, another was reference to inclusion of species in the national AWQC FCR, and the last were references by Sandie O'Neill regarding use of contaminant body burden patterns to demonstrate that salmon were acquiring contaminants from near coastal food webs. I'll provide all of these to you tomorrow.

Regards,

Lon Kissinger
